

HWCI NCAA POOL: ANNUAL STATISTICS (1995-2004)

Here are the all-time stats for the HWCI NCAA Pool. In 10 years, there have been 434 total entries from 152 different people. First place has averaged \$214.50. In 2002, the 3rd Place prize (\$130) surpassed 1995's total pot (\$120). 4th Place won as much as 1st Place did in 1995. Only once did two #1 seeds make it to the Final and only twice (including last year) have no #1 seeds faced off in the Final. #1 seeds have won all but the 1997, 1998, and 2004 tournaments.

A total of 16,468 winners have been picked, a 60.2% winning percentage. In all but three years did the entries average at least 100 points. In 2000, the 36 entries won an incredible average of 26.2 of the 32 1st Round games (81.9%). In 1999, the 36 entries had a whopping 65.3% winning percentage of picking the two teams in the Final. IN 2004, the entries picked a low of 0.75 of the 4 Final Four teams.

NOTES: Entry vs Person. A new entry could be a person entering a second (or third) entry in the pool for the first time. # NEW ENTRIES/YR- Number of brand new people or 2nd/3rd entries; # YEARS/ENTRY- Number of people who have participated in the pool 1-8 times (e.g., there are 74 entries that have participated just once); RETURN ENTRIES- Number of entries that have participated in a prior pool.
